

# INTRODUCING FOR PILOTS

## A NEW STANDARD IN NOISE CANCELLING HEADSETS

{ FROM THE COMPANY THAT FIRST INTRODUCED THE CONCEPT }

We recently introduced the Bose® QuietComfort® 15 Acoustic Noise Cancelling® headphones for the public. They were widely acclaimed as having the best performance available among all brands.

At the same time, we have been developing a new headset for PILOTS, the Bose A20™ Aviation Headset. It uses similar technology to that of the QC®15 headphones, but it is designed for the very high noise levels present in the pilot's cockpit.

### Provides the Following Advantages:

1. Significantly greater noise reduction than currently available.
2. Improved level of comfort.
3. Clear audio.
4. *Bluetooth*® communications interface.
5. Auxiliary audio input.
6. Priority switching.
7. Made in the U.S.A.
8. Meets or exceeds all TSO standards.

**Fly with it for 30 days, risk free.**  
Then try flying without it.

**BOSE**®  
Better sound through research®
